

# MANUAL LIFT ALIGNER

*Manual Lift Aligner allows rough spotting of railcars*

The Houston Vibrator Hopper Car Unloading Lift Aligner is a manually operated device that allows “rough spotting” of the rail car. The Aligner is used to move the Hopper Car Unloading Lift under the hopper car as needed for a proper seal. The Aligner can be mounted on either side of the Hopper Car Unloading Lift.

Aligner is shown above, with Model #485 Hopper Car Unloading Lift, sold separately.
