

# Viber® Portable Gasoline Power Units

*Anytime...Anywhere...with Power to Spare!™*

These 4-cycle engines run on unleaded gasoline – no mixing of oil and gas is necessary. Viber gas powered units can be used on the most remote jobsites where no electrical power is available. Our high strength steel alloy Quick-Disconnect is standard on all models – quickly and easily attach the flex drive to the engine with a simple twist of the wheel – no tools required. A built-in kill switch provides extra operator safety.

The VMG-2500BP utilizes the Honda engine - small and compact, but powerful enough for almost any application. Both VMG-1750 models feature a Subaru engine - this amazing overhead valve engine continues operating in any position, allowing the operator to move or bend as needed.

## VIBER® GASOLINE POWER UNITS

PART #	MODEL #	DISPLACEMENT	HORSE-POWER	MAX HEAD SIZE	NET WT LBS
913175	VMG-1750HH	2 CU. IN.	1.6 HP	1-3/4"	13
913176	VMG-1750BP	2 CU. IN.	1.6 HP	1-3/4"	18.5
913250	VMG-2500BP	3 CU. IN.	2.5 HP	2-1/2"	26.8

Quick Disconnect fitting is built into the design. To attach the Flex Drive to the power unit, order a Flex Drive with a 'Drive Fitting' or order the Drive Fitting separately.

### VMG-2500BP Backpack Unit
