Name _____ Company _____
Address _____ City _____ St/Prov _____ Zip _____
Email _____ Phone _____

STEP 1: CHARACTERISTICS OF STORED BULK MATERIAL

Material _____ Bulk Density (lbs/ft3) _____
Moisture Content _____ Material Temperature (F) _____
Max Ambient Temperature (F) _____ Particle size Max _____ Min _____

Material Characteristics – Mark “X” for all that apply

Abrasive _____ Flaky _____ Granular _____ Corrosive _____ Liquid _____ Sticky _____
Dry _____ Explosive _____ Powder _____ Fluffy _____ Toxic _____ Hydroscopic _____
Other(describe) _____

STEP 2: POWER SOURCE AND STORAGE STRUCTURE

Power: Air _____ PSI _____ CFM _____ Electricity _____ Voltage _____ Phase _____
Electrical Classification: Class _____ Division _____ Groups _____

Hopper Construction: Steel _____ Concrete _____ Other(describe) _____
Wall Thickness _____

Square/Rectangular Hopper: Dimensions L _____ W _____ H _____ Discharge: L _____ W _____
Round Hopper: Dimensions Diameter _____ H _____ Discharge Diameter _____

STEP 3: MATERIAL FLOW PROBLEMS

Description _____

STEP 4: SCOPE OF OBJECTIVE

Restore flow _____ Aerate _____ Increase production _____ Clean/Sweep interior walls _____
Reduce Clean-out Cost _____ Increase storage _____ Reduce noise _____
Cleanenvironmentrequirement: Yes _____ No _____
Comments _____
